NOTE :	This Message originated outside your organization.

We need to find the **root cause** of this issue. Need to update this to management.
It is escalated to high level and got the remark like; issue is permanent and beyond IT skillsets.

Dear Zawed,

We have resolved the issue, and the data is now displaying correctly in the ZFRC Smart Form.

Kindly check and confirm.

@Zawed Hussain,

As discussed earlier regarding this issue, Raj Kumar has already discussed the matter with the user and advised him to correct the mistakes while creating the GRN.

Kindly coordinate with your internal team and ensure that the required corrections are followed during GRN creation, as there is no issue from our side.

Thanks & Regards,
Amit Lal

Subject: **RE: Not Showing ECU Number and Production Dater for Newly Billed Vehicles**

Dear Team,
@Gaurav Shah @Ajit Rane@Ajay Awale sir
We are facing the same issue again. Could you please investigate the root cause and take the necessary corrective actions to ensure that this issue is resolved permanently and does not recur?
ECU Number and Production Date are not being displayed for the below-mentioned invoices.
This issue was reported earlier, and**your team had informed us that it was resolved and would not occur again**.
However, we are facing the**same issue again**.
Due to this,**CRTEM cannot be completed today, and vehicle dispatches will be delayed**.
Please treat this as**high priority, identify the root cause,**
And provide an immediate and permanent resolution to avoid further operational impact.

SPEED LIMITER INSTALLATION CERTIFICATE

This is to certify that the following vehicle has been fitted with speed limiter device/governor manufactured by M/s. Zhuopin Intelligent Technology Co., Ltd., China and supplied by M/s. Sany Automobile Manufacture Co., Ltd., complies with the provision of Rule 118 of Central Motor Vehicles rules, 1989 i. e. conforms to the standards AIS and controlled BLUE ENERGY MOTORS LIMITED. The speed has been set to a maximum speed of 80KM PH.

Certificate is issued only after testing.

Subject: Re: RE: Incorrect Engine Number for Newly Billed Vehicles

Dear Sreevalsan M Sir,

We acknowledge that despite our earlier communication regarding a permanent fix, the issue has reoccurred. Please find below a detailed explanation of the root cause, corrective actions taken, and preventive solution.

1. Root Cause Analysis

The issue is related to the custom transaction **ZMM_MIGO_SERIAL/ZPPQ1**, which is used for updating serial numbers due to order.

- In certain cases, while the serial number was successfully updated in MIGO, the corresponding **engine number was not getting updated in table ZPP01 multiple order at same time.**
- This inconsistency occurred due to:
  - Missing/failed update logic between the custom transaction and ZPP01 table
  - Incomplete trigger of update during specific scenarios (e.g., partial postings or background processing delays)

As a result, incorrect engine numbers were being picked during invoice printing.

2. Corrective Action Taken

- The update logic in **ZMM_MIGO_SERIAL/ZPPQ1** has now been reviewed and enhanced.
- A validation step has been introduced to ensure:
  - Serial number update is successfully written into ZPP01 before completion of the transaction.
  - Existing incorrect records have been identified and corrected.
- Additional checks have been implemented in the invoice process to prevent incorrect data selection.

3. Preventive Solution (Permanent Fix)

To ensure this issue does not recur:

- **Data Validation Control:** System now enforces validation between serial number and engine number before saving in order
- **Error Handling Mechanism:** In case of update failure, the system will stop the transaction and prompt an error instead of allowing incomplete data.
- **Monitoring & Logging:** A log mechanism has been introduced to track all updates made via ZMM_MIGO_SERIAL.
- **User Awareness:** Relevant users have been guided to follow the correct process flow.

We confirm that the above corrections have been successfully tested and validated in the PRD server. The changes have been transported via transport request no. BEDK902305.
We will monitor the system for a couple of weeks and ensure that the logic applied makes the system stable and error free.

Thanks & Regards

Dear Rajkumar
Your mail on 8th Jan confirmed that a permanent corrective solution has been implemented; however it is not so and the problem has cropped up again.
I need**you** to confirm the root cause for the error in detail with screenshots and also inform us what change has been made by you for rectifying it. Also need an explanation from**you** why this won't happened in future.
@Ajay Awale: With the number of issues happening in SAP, need you to validate the same and confirm that the correction done is ok. We cannot be accepting empty commitments on rectifications.

Dear Mr. Ajit/Gaurav,
We have noticed that the same issue has been occurring repeatedly.
While it has been resolved each time upon raising an email, it unfortunately keeps recurring.
Kindly review and resolve the issue for the newly billed vehicles mentioned below
And ensure that a permanent solution is implemented to prevent recurrence going forward.

Subject: **RE: Traction motor no issue in invoice copy.**

Dear Mr. Ajit/Gaurav,
May I know why the same issue has been recurring for the past three months?
Do we need to raise an email every time to get it resolved, only for the issue to reappear again?
Kindly resolve the issue highlighted in the trail mail for the freshly billed vehicles mentioned below and ensure a permanent fix going forward.

Chassis No.	Motor No.	Billing Doc No.
MD9A3ALB0SP836031	M4102509050048	90001402

Subject: FW: Traction motor no issue in invoice copy.

Dear Amit,
For billing documents 90001385 and 90001392, the motor number is showing an extra ",M41".
This is a recurring issue, as it had occurred last month as well (refer to the previous email trail).
Request you to please resolve this and ensure adherence going forward.

Regards,

Jaick Alam
